

my name	
who's work am I critiquing?	
For each of these you only need to identify and state on thing.	
<p>yellow — positives one positive thing that you observed in the work that you would consider using in your own work. So something you liked in the work</p>	
<p>green — creative, open thinking ideas and suggestions that may lead to something interesting. Make a suggestion for how something might have been done differently in the work. Not because how it has been done is bad, wrong, or poor, but as an alternative. With green it is always good to have a sentence as to why. eg “have you tried cutting it less quickly so that the images have their own life?”</p>	
<p>red — emotional immediate reaction to the film. Single word, but not ‘Like’, or “don’t like”. Use an adjective. Dour. Flashy. Serious. Excitable.</p>	
<p>white — information what else did you want to know after watching it that it could have said?</p>	
<p>black — problems A single problem you think is in the work. You do not need to provide a solution. But do be specific.</p>
