

DIVESTMENT DAY

**USE YOUR  
SUPER  
POWER.**

JUNE 5, 2020

# DIVESTMENT

## HOW TO DO IT.

### Step 1: Put the company on notice.

Tell your super fund/bank that if they continue to support fossil fuels, you'll choose a different company.

### Step 2: Find a new company.

Scope out which super funds/banks support renewable energy. You can find out which ones align with your values by heading to our website.

### Step 3: Make the switch.

For a more detailed How-To, we can help! But it's important to let the old and new company why you're switching.

# DIVESTMENT

## WHAT YOU SHOULD KNOW.

### WHAT IS IT?

To put it simply, divestment is the opposite of investment - the act of removing your money that has been invested elsewhere. Our focus is on the divestment from unethical super funds and banks.

### WHAT'S THE IMPACT?

On a personal level, divestment means that you get to choose where your money is invested, and you have the option to support companies that align with your values.

The cutting of ties with these companies will put pressure on them to make more ethical choices and to consider changing their model to support renewable energy.

**For more information, such as how to divest, head to our website.**
